BEEKEEPERS CALANDAR

NOVEMBER AND THE BEES: The bees continue to cluster for winter. They may not yet go into a full winter cluster, and may actually develop two clusters. They may break cluster frequently on warm days and re-cluster at night. But they will begin to cluster for the winter.

NOVEMBER AND THE BEEKEEPER: Feed your light hives as long as the sugar water doesn't freeze. Finish up all winterization of your hives. On a cold day when the bees are all inside, weed-eat around your hives. Enjoy Thanksgiving! Start purchasing next year's equipment.
